

SIGS (Special Interest Groups)

When you plan to attend a SIG meeting and have specific questions or problems you would like someone to work on or answer, please email us at info@lvpcug.org. This will help assure that we will try to have someone there with the expertise. The email Subject Line: SIG Help

The meeting formats for the Helping Hands & How-to SIGS are usually one-on-one help as compared to the Novice SIG which is group attendance with questions and answers from the audience during and after the presentation.

5 Ways to Protect Yourself From Computer Hackers

1. Use strong passwords: enough said.
2. Think before you click: Don't open things just to see what they are.
3. Protect yourself: An ounce of protection or make a pound of antivirus and malware programs.
4. Be wary of scareware tactics: Ransomware attacks will attempt to trick you into thinking your computer is infected and get you to buy useless software or pay money directly to have it removed.
5. Safeguard your personal data: The information you share online puts you at risk don't tell the world when you won't be home.
