## Tips & Tricks For Windows 10 Clipboard | Daves Computer Tips

The Windows Clipboard has always been capable of holding only one item at a time, but that has all changed now with the debut of the new Clipboard Manager in Windows 10 version 1809.

Follow the steps below to learn how:

Press the Windows key + V to see the current contents of your Clipboard Manager, which, by the way, can hold up to 25 items simultaneously!

Scroll through the list to see all the content you have clipped, in reverse chronological order.

Click any item to paste it at your current insertion point. This feature will save you a lot of time when you are gathering data or images from different sources to use in a presentation or an article.

Click the three dots in the upper-right corner of any clipped item to delete it from your Clipboard Manager, pin it for quick access, or delete the entire Clipboard contents.

## How To Clone To New SSD | Daves Computer Tips

There is no doubt that in this day and age updating from a standard HDD to SSD is one of the most effective upgrades available and, thankfully, it is becoming more and more affordable. Cloning an old hard drive to a new SSD is a fairly simple process really, even if your imaging software does not support a system cloning feature.

## How To Move Your Website To Another Server | Daves Computer Tips

FileZilla Is Your Friend

In 2018 I wrote about How Not To Restore A Crashed Website, but on that occasion, it was a rescue mission because of a crash beyond my control. Last week I needed to move an existing website from one hosting plan to another within the same hosting company, GoDaddy, a company that gets a lot of stick and harsh criticism, most of which is unfounded in my opinion.

[https://davescomputertips.com/how-to-move-your-website-to-another-server/?utm\\_source=mailpoet&utm\\_medium=email&utm\\_campaign=dave-s-](https://davescomputertips.com/how-to-move-your-website-to-another-server/?utm_source=mailpoet&utm_medium=email&utm_campaign=dave-s-)

## "TOP FEATURES Windows 10 20H1 Version 2004 May 2020

Cortana now a stand alone app in version 2004

<https://www.youtube.com/watch?v=HQLA-3JPSc&feature=youtu.be>

\*\*\*\*\*

This actually happened to me — some time back now — but I thought I'd mention it just in case anyone else is experiencing this same issue

You plug in a USB flash drive, or USB external hard drive, and nothing happens,—nothing! The drive is not listed in the safely remove dialogue and doesn't appear under This PC. I discovered this can easily be remedied with a restart but it had me flummoxed as to why it should be happening in the first place.

Turns out, there is a power saver setting in the properties of USB hubs that automatically powers the hub down. I am assuming this option is included by Microsoft specifically to help increase battery life on laptops. I certainly can't see any possible use for it with a desktop plugged into mains power.

The fix is a simple matter of disabling this option... why Microsoft would enable it by default is beyond me, but there it is.

## How to Check If Your Windows 7 Apps Are Compatible With Windows 10

One of the biggest issues holding people back from upgrading their (really) antiquated copies of Windows 7 is app compatibility. If you have some super-specific application that simply won't (or can't) run on Windows 10, that's as good a reason as any to stick with a less-secure operating system. It might not be the right move, but it's a necessary move.

But you're not doing yourself the biggest favor if you're assuming your apps won't work in Windows 10. It's time to take the plunge—not to upgrade and hope for the best, but to try out Windows 10 and see if your everyday apps work as you expect them to. If they do, and your system's hardware is good enough to run Windows 10, you owe it to your system's security to switch over.

[https://lifehacker.com/how-to-check-if-your-windows-7-apps-are-compatible-with-1841027283?utm\\_source=lifehacker\\_news\\_letter&utm\\_medium=email&utm\\_campaign=2020-01-16](https://lifehacker.com/how-to-check-if-your-windows-7-apps-are-compatible-with-1841027283?utm_source=lifehacker_news_letter&utm_medium=email&utm_campaign=2020-01-16)

that prompted an unprecedented public warning from the U.S. National Security Agency. This month also marks the end of mainstream support for Windows 7, a still broadly-used operating system that will no longer be supplied with security updates.

## Edge & Defender – Ready for Prime Time? | Daves Computer Tips

As first reported Monday by KrebsOnSecurity, Microsoft addressed a severe bug (CVE-2020-0601) in Windows 10 and Windows Server 2016/19 reported by the NSA that allows an attacker to spoof the digital signature tied to a specific piece of software. Such a weakness could be abused by attackers to make malware appear to be a benign program that was produced and signed by a legitimate software company.

Read the rest of the story...

When Edge was first introduced to the public as part of the new Windows 10 operating system, I absolutely lambasted Microsoft for including a browser that was clearly underdeveloped and far from ready for mass use. It was clunky/awkward, no extensions, and had next to zero chance of competing with the likes of Chrome and Firefox. However, that situation has changed quite dramatically over the past few years as ongoing development has seen Edge finally catch up to somewhere near what it should be in the first place.

## How To Create New Folders | Daves Computer Tips

## Microsoft today released updates to plug 50 security holes

## Basic Computing 1 – Creating New Folders

Microsoft today released updates to plug 50 security holes in various flavors of Windows and related software. The patch batch includes a fix for a flaw in Windows 10 and server equivalents of this operating system

A comment from a reader in response to a recent article reminded me how tech writers (myself included) tend to forget that some less proficient computer users might struggle with basic operations... operations that we tend to take for granted. With that in mind, I decided to compile a series of guides, specifically

for less proficient users, detailing some of the most common basic procedures. This is the first in the series.

There are many reasons why users might need to create new folders including to save/store files on a new external drive, to separate and identify different files within an existing folder or directory. Here's how:

### Creating New Folders

Open the folder, directory, or drive where you want to create the new folder. Right-click any blank space inside that window and select New > Folder:

[https://davescomputertips.com/how-to-create-new-folders/?utm\\_source=mailpoet&utm\\_medium=email&utm\\_campaign=dave-s-computer-tips-weekly-recap-for-date-custom-or-format-l-js-f-y\\_1](https://davescomputertips.com/how-to-create-new-folders/?utm_source=mailpoet&utm_medium=email&utm_campaign=dave-s-computer-tips-weekly-recap-for-date-custom-or-format-l-js-f-y_1)

### How To Tame Windows 10 Storage Sense

[https://davescomputertips.com/how-to-tame-windows-10-storage-sense/?utm\\_source=mailpoet&utm\\_medium=email&utm\\_campaign=dave-s-computer-tips-weekly-recap-for-d](https://davescomputertips.com/how-to-tame-windows-10-storage-sense/?utm_source=mailpoet&utm_medium=email&utm_campaign=dave-s-computer-tips-weekly-recap-for-d)

We are looking for Volunteers for our SIG's Meeting. We would like to start more SIG's like Photo, Music and Internet. If you are interested please contact any Board Member to let us know. Thanks for all your help

### LVPCUG Officers

for fiscal year

May 1, 2019 thru April 30, 2020

President: Ceazar Dennis

Vice President: VACANT

Executive Director: Lee Eastburn

Secretary: Jo Rush

Treasurer: Linda DiGiovanni

Membership in LVPCUG is your biggest bang for the buck. Where else can you learn, have problems diagnosed and get help fixing your hardware for \$30 per year?

**Dues are \$30 per year.** Checks should be made payable to LVPCUG and sent to: P.O. Box 363772 North Las Vegas, NV 89036 or can be paid in cash at any meeting.

our website: [www.lvpcug.org](http://www.lvpcug.org)

The Bytes of Las Vegas is published by the Las Vegas PC Users Group of Las Vegas, Nevada.  
Linda DiGiovanni, Editor
