

## **SIGS (Special Interest Groups)**

*When you plan to attend a SIG meeting and have specific questions or problems you would like someone to work on or answer, please email us [novicesiglv@yahoo.com](mailto:novicesiglv@yahoo.com). This will help assure that we will try to have someone there with the expertise. The email Subject Line: SIG Help*

*The meeting formats for the Helping Hands & How-to SIGS are usually one-on-one help as compared to the Novice SIG which is group attendance with questions and answers from the audience during and after the presentations.*

## **UPCOMING CLUB EVENTS**

UPCOMING SIGs  
(Special Interest Groups)

**ALL MEETING ARE CANCELED  
UNTIL FURTHER NOTICE!**

To help combat the spread of the COVID-19 virus, Nevada Governor Steve Sisolak has ordered the closing of nonessential businesses, including restaurants. So all LVPCUG meetings at New York Pizza are cancelled until the closure order is lifted and public dining is resumed.

## How to repair Master Boot Record (MBR) on Windows 10 • Pureinfotech

How to repair Master Boot Record (MBR) on Windows 10 • Pureinfotech  
Master Boot Record (MBR), sometimes also referred to as the “master partition table” or “partition sector,” is the most important piece of information that enables a computer to find and identify the location of the operating system to allow Windows 10 to boot.

Sometimes due to viruses or other types of malware, system settings changes or incorrectly shut down can corrupt the Master Boot Record. Other times, you may even come across the Bootmgr Is Missing error message that will prevent the device from starting.

Sometimes due to viruses or other types of malware, system settings changes or incorrectly shut down can corrupt the Master Boot Record. Other times, you may even come across the Bootmgr Is Missing error message that will prevent the device from starting.

If you ever have such a problem, you will have to fix the MBR to enable Windows 10 to load again using an installation media and a few Command Prompt lines.

In this guide, you will learn the steps to repair the Master Boot Record on a Windows 10 device.

## Why You Should Delete Emails Instead of Archiving Them (howtogeek.com)

We've all been trained to archive every email we get. After all, we have basically infinite storage, and we can just find all the emails we need with a quick search, right? Makes sense. But that's a trap.

## Microsoft Edge browser will warn you if your password has been leaked online

The new Edge 88 browser includes tough new security features, including a password generator and a tool for monitoring whether your login details have been exposed to the dark web.

Microsoft Edge 88 is rolling out to users in the Stable channel alongside some new privacy-focused features, including a long-awaited credentials monitor and a built-in password generator.

The first of these features, Password Monitor, will help users stay protected against data breaches involving passwords. If

Edge determines that a user's login credentials have been exposed on the dark web (or elsewhere), it will notify them within the browser and advise them to update their passwords
